

INDEFINITELY POSTPONED.

An application was made by the Metropolitan Street Railway Company for a supply of water for their power house at Fulton park. It being stated that it would be impossible to furnish such supply until after the new pump and main were completed, and objection being made on the ground that a number of applications from parties in that vicinity, which is outside the city limits, had been re used, it was ordered that the matter be indefinitely postponed, and the company informed that they could not be supplied at present.
